

FOR IMMEDIATE RELEASE: SNIBBLE CORP FILES PATENT PROTECTION FOR ITS UNIQUE SOCIAL VIDEO PLATFORM.

TORONTO Feb 7 2020: Snibble, the world's first premium social video platform, announced today the issuance to it by the US Patent Office of a provisional patent that covers the integration of streaming video and social media securing the company's technical advantage in the fast-growing video streaming business.

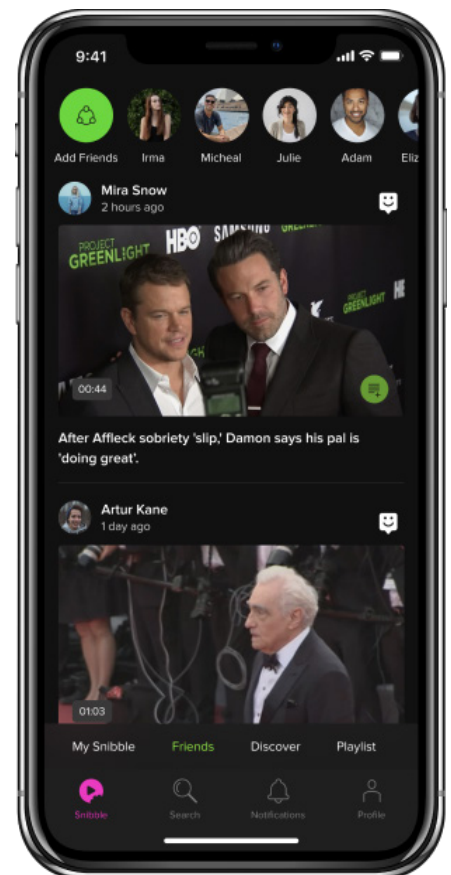

The patent for invention application number 62/966,068 is for a wireless system for distributing premium rights-protected video alongside real-time social media messaging allowing viewers to share video with invited friends, comment and watch together in real time.

"Snibble is the first platform that allows users to seamlessly share video and have conversations around videos as part of their daily social routine" said Blair Currie, CEO, Snibble Corp. "This is the first of several patents we'll be issuing to protect our Snibble technical lead in this highly competitive market and it adds confirmation to Snibble Corp's leadership in developing ground breaking technology that allows consumers to share entertainment."

About Snibble Corp

Snibble is the first premium mobile video platform that seamlessly combines what Gen Z and Millennials do most on their phones – watch video and engage with social media. Using Snibble's proprietary technology users can find, watch and share the world's best video content with their closest group of friends in a private social network. This highly engaged Gen Z audience offers marketers high quality brand exposure and measurability.

Based in Toronto, Canada, one of the leading tech markets in the world, Snibble has raised over \$2 million from private investors to bring this unique premium social video vision to market.

Statement under the Private Securities Litigation Reform Act:

With the exception of the historical information contained in this release, the matters described herein contain forward-looking statements that involve risk and uncertainties that may individually or mutually impact the matters herein described, including but not limited to, product acceptance, the ability to continually obtain increased orders of its products, the ability to meet installation goals, economic, competitive, governmental impacts, whether pending patents will be granted or defensible, validity of intellectual property and patents, the ability to license patents, the ability to commercialize developmental products, as well as technological and/or other factors.
